PROFESSIONAL SUMMARY

Master of Science in Digital Forensics (MSDF) candidate at the University of Central Florida, building on a Bachelor of Science in Computer Science and over 4 years of experience in coding, systems programming, scripting, and automation. Developing hands-on skills in digital evidence acquisition, hex-level data analysis, and file system forensics, backed by a strong foundation in data structures, algorithms, and problem resolution, coupled with proven leadership in driving meaningful projects from conception to completion

SKILLS

Forensic Tools & Concepts: Hex-level analysis (Hex Fiend, WinHex), Disk Imaging (dd, FTK Imager), Data Hashing & Integrity Verification, Digital Evidence Acquisition

Coding Languages: C, Python, Java, MIPS Assembly, HTML, CSS, PHP, JavaScript/Typescript

Languages: English, Hindi, Gujarati

Experienced platforms/frameworks: AWS, Next.js, Node.js, React, TensorFlow Vite, Microsoft Office, AutoCAD, SolidWorks, IDLE, Visual Studio Code

EDUCATION

University of Central Florida- Orlando, FL

Master of Science in Digital Forensics (MSDF), In Progress

- **Relevant Coursework:** Computer Forensics I(hex-level data analysis, hashing, and file system forensics)

University of Central Florida- Orlando, FL

Bachelor of Science in Computer Science, June 2026, GPA: 3.5

- **Organizational Involvement:** Knight Hacks, Artificial Intelligence Club, Association for Computing Machinery, UCF Students for Humane Technology
- **Relevant Coursework:** Data Structures & Algorithms I & II, Processes for Object-Oriented Software Design, Algorithms for Machine Learning, Systems Software, Operating Systems, Computer Logic & Organization, Security in Computing, Web & User Experience (UI/UX)

PROJECTS

PRINT Automation (Project Manager) - Capstone Project

09/2025-05/2026

- Lead a 5-person team in updating and improving the **UCF CHDR PRINT** research site, with adding and updating features for the backend and frontend, such as key word analysis, topic modeling, and a refined search.
- Implemented a **Natural Language Query** feature to make researching more intuitive for users.
- Reconciled the MySQL PRINT database with their older databases to get rid of duplicate or missing data and added automated exports to partnered organizations.

CloudSaver (Project Manager)

10/2025

- Developed a full-stack cloud cost optimization tool that analyzes cloud billing CSVs, providing LLM-driven, human-readable recommendations and cost-saving actions.
- Engineered an asynchronous backend using **FastAPI**, **Pandas**, **Uvicorn**, and **asyncio**, reducing analysis latency nearly 10x via concurrent LLM calls.
- Designed a modern **React + Vite** frontend with visual analytics using **Chart.js**, enhancing user experience and accessibility.

WORK/INTERNSHIP EXPERIENCE

Motorola| Fort Lauderdale, FL

Shadowing Intern June 2022 - June 2022

- Shadowed senior software engineers and directors, engaged in debugging codes, process optimization, and feature development within complex systems. Gained hands-on experience in testing, including drop tests for radios
- Delivered a presentation on innovative technological solutions for natural disaster relief and preparedness, demonstrating both technical proficiency and strategic thinking

MATE ROV Robotics Competition (Regional)| Weston, FL

Team Lead August 2021 - May 2022

- Led development of custom circuit boards and integrated electronic triggers for the control system of a submersible robot in the MATE ROV Robotics regional competition
- Designed and soldered circuit boards, seamlessly connecting components within a control box to optimize robot's maneuverability and precision during underwater operations
- Engineered a submersible robot utilizing 3D-printed components, PVC pipes, motors, and custom claws, equipped with attachable cameras and netting to perform complex underwater tasks with precision and stability
